PROPRIETORS OF THE WEST INDIA

Stomach Bitters.

No. 26, South Second Street,

SAINT LOUIS, MISSOURI

This great Tonic has been introduced to the people of the Mississippi Valley for the past thirteen years with unbounded success and popularity.  
There is nothing of the kind extant that equals it as a stimulant, an appetizer, or anti-dyspeptic. It is particularly adapted to malarious districts and is a

### Preventative of Chills,

is not surpassed.  
It is endorsed by the best chemists as the most efficacious, strengthening Tonic this country has ever produced, the value of which will be recognized by all who may use them.  
Private citizens of Arizona visiting St. Louis have expressed their convictions that it is particularly adapted to the wants of that Territory, and needs only a trial to insure its speedy introduction there.  
Orders addressed to THE WEST INDIA MANUFACTURING COMPANY will be promptly executed.  
dec 13 '84

I will pay \$100 Reward for the arrest and conviction of any person or persons unlawfully handling cattle or horses in the above brands. Ear tags—both ears split, horses branded on left thigh with the same brand.  
BOB STEAD, Globe, A. T.

## ROYAL BAKING POWDER

Absolutely Pure.

This powder never varies. A marvel of purity, strength and wholesomeness. More economical than the ordinary kind, and cannot be sold in competition with the multitude of low test, short weight, adulterated, or phosphate powders. Sold only in cans. ROYAL BAKING POWDER CO., 106 Wall Street, N. Y.

The press report recently sent out from Denver stated under the authority of Col. R. B. Stanton, the chief of the surveying party which went through the Canyon last winter, that a vast number of gold and silver ledges were discovered by the party during their trip, is the sheerest fabrication. Col. Stanton positively assured the writer that with the exception of the already known placer mines, he knew of no other gold or silver indications in the entire Canyon. As to the number of men in the Grand Canyon mines and the richness of the reported discoveries, the following letter from a Mohave County miner, who went to see for himself and others, will explain the situation there:

GRAND CANYON, April 19th, 1890.

FRIEND POTTS:—We are here all right. They have a large ledge of sulphurets ore that will go about sixty cents to the ton. There are about twenty men here. The majority of us will go back in a few days. Tell your friends to keep away from here. If you have any mail for me please forward it to Flagstaff, and oblige.

So many inquiries are made about the Grand Canyon discoveries at the Miner office that the above statement is made, and until further developments are made there it would be well for the miners to stay where they are. The district may possibly yet prove to be a good one, or it may be another Harqua Hala.

What Education of the Freedman Has Cost.

Dr. Atticus G. Haygood, the agent of the Peabody Fund, says the following sums from Northern churches have been expended for the education of Southern negroes: Freedmen's Aid Society (Methodist, North), \$2,225,000; Baptist Home Mission, \$2,000,000; Presbyterian Home Mission, \$1,512,746; American Missionary Association (Congregational), \$6,000,000; the different women's societies, \$500,000; John F. Slater, \$1,000,000; Daniel Hand, \$1,000,000; other individual gifts, \$1,000,000; Quakers and other smaller religious bodies, \$500,000; a total of \$15,767,746. Down to January, 1889, the Southern States expended in aid of normal schools and in maintaining public schools for negro youth the following amounts, viz: Alabama, \$3,404,233.24; Arkansas, \$3,400,119; Florida, \$849,000; Georgia, \$2,702,276; Kentucky, \$1,362,875; Mississippi, \$7,136,890; Louisiana, \$2,150,000; North Carolina, \$2,441,002; Tennessee, \$3,835,000; Texas, \$4,064,259; Virginia, \$1,500,000; a total of \$37,377,673.24. To this total should be added \$4,000,000 for the expenditures since January, 1889.—The Independent.

A strange and painful accident occurred at Smith & Jackson's corral, near the old base ball ground, on Monday afternoon last, when Eaton had bored a three-quarter inch auger hole in the head of an empty whiskey barrel. The hole being too small for the purpose intended, he attempted to enlarge it by burning with a piece of gas pipe. The heated gas pipe had scarcely entered the barrel when an explosion followed, blowing out the head of the barrel, which striking Eaton in the face, crushed in the right cheek bone and seriously injured, if not wholly destroyed the right eye. The accident is supposed to have been caused by the explosion of gases generated from the exposure of the barrel to the heat of the sun, the application of the hot iron producing similar results as a match to gunpowder. Mr. Eaton is very seriously injured and only recovered consciousness many hours after the accident.—Silver City Enterprise.

The decree of the Provisional Government of Brazil muzzling the press of that country will give more aid and comfort to the foes of popular institutions throughout the world than to its friends. A political system which can stand the reasonable and moderate criticism of a free and intelligent press does not appeal very strongly to the support of the champions of Republican doctrines.—Globe-Democrat.

Grand Canyon Boom.

[Mohave Miner.]

The Flagstaff papers of last week's issue come to us without a line in regard to the recent reported discoveries of rich mineral deposits in the Grand Canyon, north of that place. So far the richest rock found in the new strike has assayed but 190 ounces per ton in gold and silver, mostly the latter, and samples of ore from that place sent to the writer have assayed from six to twenty-four ounces per ton. The ledges are said to be from 20 to 300 feet in width, and the above assay can be had from any part of the ledge, and it is probable that low grade ore exists in quantities. But there is no reason to believe that the reports sent out can be relied on, that mineral of great value can be found anywhere a pick is struck.

The press report recently sent out from Denver stated under the authority of Col. R. B. Stanton, the chief of the surveying party which went through the Canyon last winter, that a vast number of gold and silver ledges were discovered by the party during their trip, is the sheerest fabrication.
